

Karen M

"I have found Jane's group healings to be fun, educational and highly beneficial. The vibrational healing energy present in her group is phenomenal! I always learn something new and I leave feeling better and more light-hearted. I love Jane's goal of helping us help ourselves by teaching us self-healing techniques...and the points she assigns us are very effective. I've learned all sorts of modalities in energetic healing, and incorporating her points and insights has been very helpful. In the 6 months I've come to group and as a client, I have watched Jane evolve and benefited from her heightened, enhanced corrections. Just when you think it can't get better, Jane downloads more from the matrix and you are going on another healing journey of awe and wonderment."

"My vision has improved over the few minutes she spends with me each week at group. I actually had dramatic results the very first time she worked on my eyes where I had 20/20 vision in my right eye from a slightly near-sighted and astigmatic vision. I foolishly put my glasses back on, so I don't know how long it would have held the correction. I was surprised to find times that my vision would be at 20/20 since...and at times, had to remove my glasses due to discomfort and voila! My vision was 20/20! I've had energy work done on my eyes before, but no one was able to make the amount progress as Jane did. I have lots of longstanding issues with my respiratory and elimination systems, and she was able to help alleviate symptoms. I am very grateful to have found her through the Multiple Chemical Sensitivities Support Group!"
