

Liz B

"I called Jane at 10:30pm because my heart had been racing for hours and the rhythm was extremely irregular. My blood pressure was way up, even with medication. I had been to my physician and had medication changes that day. I was scared and my choices were to call Jane or go to the emergency room. I chose Jane. Jane did remote work on my heart, staying on the phone with me for at least 45 minutes. She brought my pressure down to a normal level and stopped the irregular racing completely. Jane's ability to "talk" to my body and work with it is nothing short of amazing."

"That moment remains with me – thank you!"

Love, Liz -Maine
